Subject: 3-page summary for a new video on Superfund in San Juan County
Amended Superfund video summary March 8 2014.docx

Hello, Steve -

The February meeting of the Animas River Stakeholders Group at Silverton's Town Hall has inspired me to move to Silverton and produce a new video. I already wrapped one up on the Good Samaritan liability issue. Now, I want to explore the community discourse for how a CERCLA project that could be paid for by EPA, could help reduce the amount of highly concentrated mine drainage, yet, still may be labeled as "Superfund", which some in the community are not comfortable with.

Please review a 3-page summary and get back to me whether you or anyone else in EPA Region 8 would be comfortable, or authorized, to participate in this video.

My goal is to cover as many community and stakeholder positions as possible. As the chief federal regulator for the Cement Creek issues, I feel your input is critical to answer the question, "Why EPA? Why CERCLA? Why Superfund? and Why now?"

Thank you very much. If you have a question, please call me at 970-946-9676.

Tom Schillaci, Producer
